

Applying for a Transit Oriented Development

The purpose of the Transit Oriented Development (TOD) is to encourage high quality development, revitalize the area around the transit station, improve urban design, encourage a mix of land uses, encourage a safe and attractive environment for pedestrian mobility, provide open space amenities, and coordinate urban design and streetscape elements to create a distinct visual quality for the area.

Overview:

Attention to detail in the design of a TOD project will be critical to your success in receiving City approval. Emphasis will be placed on the streetscape, building design, quality materials, the pedestrian environment, landscaping and special treatments as defined in the design guidelines. A new environment for this area is planned. Take special care to review the ordinance and design guidelines carefully as you begin the design process for your project.

Incomplete applications may delay processing of the application and subsequent scheduling before the planning commission.
